LIST OF
AGRICULTURAL OUTLOOK CHARTS

1934-35

Issued November 1934

The charts on this list were selected as the most suitable for use by extension workers in presenting the Outlook. These charts have been brought up-to-date so far as data were available. As new data become available they will be added. The following descriptions include the title, number, and source of the data. In the case of charts on a monthly basis data can be secured to bring them up-to-date by writing to the Bureau. There are many other charts which are useful in special cases which can be supplied at cost upon request to the Bureau of Agricultural Economics but at a somewhat higher price owing to the fact that they are not produced in quantity, but only on special order.
